### EXPERIENCES

#### Freelance Frontend Developer & Web Application Developer

Dates: 2022 to now

- Developed and deployed multiple websites for various clients, including a real estate company, a school management system, and an interior design company showcasing 360-degree views of interiors.
- Utilized technologies such as HTML, CSS, Java, React, and Node.js to create responsive and user-friendly web applications.
- Implemented a 360-degree visualization website for a project named D'ellevisit, incorporating professional and artistic elements for restaurants.
- Designed and developed a school management app in Xcode, including features like teacher and student registration, class management, and subject management.

#### English Teacher

International School of Gisenyi, Gisenyi, Rwanda

Dates: December 15, 2023 to July 2, 2024

- Delivered engaging and interactive English lessons to students, enhancing their language proficiency and confidence.
- Developed lesson plans and educational materials tailored to students' needs and learning styles.
- Encouraged students' intellectual and emotional growth through personalized instruction and positive reinforcement.
